4.	Toagosei Group's Initiatives to Improve Our Price-to-Book Ratio (PBR)	P.29-
5.	Appendix	P.36-

Results for 2Q FY2023

Business Environment

- Interest rates were raised to combat inflation in Europe and the U.S. Meanwhile, monetary easing continued in Japan to ease inflation. The pace of recovery in the Chinese economy slowed.
- It became possible to see a movement to reorganize supply chains due to decoupling because of the power struggle between the U.S. and China.
- The sense of an economic slowdown in the manufacturing industry is also becoming more intense in Europe and the U.S. Against this background, the operating efficiency of production equipment for basic materials such as ethylene has remained low over a long period of time.

Overview of Financial Results for 2Q FY2023

- Commodity chemicals and other segments located upstream of a wide range of fields were greatly affected by the Japanese and overseas economies. That led to overall decline in shipment volume.
- Sales increased for developed products including products for automotive batteries and medical care products.
- Net sales, operating income, ordinary income and net income attributable to owners of parent declined in 2Q FY2023 in a year-on-year comparison.

Results Forecast for FY2023

Business Environment

- Expectations for an economic recovery are rising in Japan. For example, there has been a recovery in the production volume of automobiles, a normalization of economic activities with the end of the COVID-19 pandemic and significant wage increases.
- There is uncertainty about the future with the Ukraine situation, inflation trends in the U.S., economic conditions in Europe and China, and reorganization of supply chains due to the power struggle between the U.S. and China.

Challenges in the 2nd Half of FY2023

- We will expand business and secure profits by flexibly responding while paying attention to supply chain, market condition, raw fuel price and other trends.
- We will place a focus on R&D and accelerate the pace at which we turn the products we develop into a success.
- We will deepen our capital policy. We will aim for consolidated total shareholder returns of 100% during the period of the Medium-Term Management Plan 2025. We plan to increase our annual dividend by 4 yen in 2023. We intend to increase our interim dividend from 18 yen to 20 yen and our year-end dividend from 18 yen to 20 yen for a total of 40 yen. We will continue to acquire treasury stock within our acquisition limit of 6 billion yen.

Topics

(1) Strengthening of New Product and New Technology Development Capabilities

- Preparations to establish Kawasaki Research Laboratory
- Medical care business

(2) Increase in Overseas Net Sales

- Establishment of a new company in China
- Global expansion of Aron Alpha

(3) Contribution to the Realization of a Sustainable Society

- Initiatives toward carbon neutrality

Preparations to Establish Kawasaki Research Laboratory

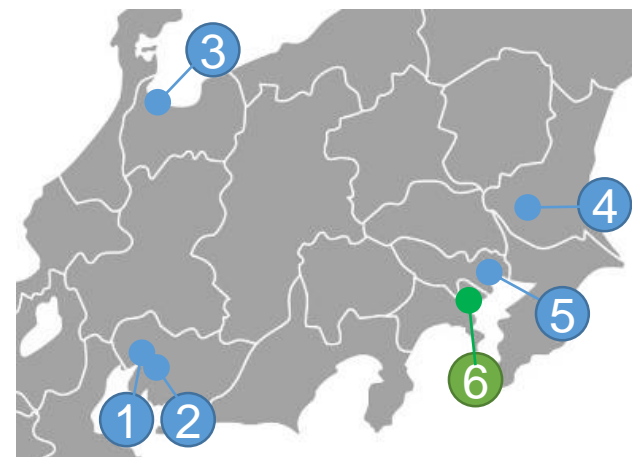

We plan to open Kawasaki Research Laboratory in 2024 as a new research base in the Toagosei Group.

Purposes of Establishing Kawasaki research Laboratory

- To create new businesses (fourth pillar)
- To expand business areas with existing product groups
- To develop products in collaboration with customers and external research institutes in the Tokyo metropolitan area

Medical Care Business

- We will commercialize NUCLEROLARON cellular membrane permeable peptides suitable for drug delivery systems (DDS).
- We are developing a hemostatic agent using Hydrogel.

TOAGOSEI Group's Research Bases

- (1) General Center of Research and Development
- (2) Monozukuri Center
- (3) Takaoka Creation Laboratory
- (4) Institute for Advanced Sciences
- (5) Tokyo Technology Laboratory
- (6) **Kawasaki Research Laboratory**

Establishment of a New Company in China

- We established Toagosei (Shanghai) Management Co., Ltd. in May as a central base for our sales, development and management operations in China.
- This will accelerate the pace of our development of the Chinese market in the batteries field.

Toagosei (Shanghai) Management Co., Ltd.

Global Expansion of Aron Alpha

- U.S.: We will increase sales of new products for consumers. We will consider restructuring plans.
- China: We will strengthen e-commerce sales.
- Thailand: We will expand the number of places where we deliver Aron Alpha.
- Southeast Asia: We plan to gradually increase the number of countries where we sell Aron Alpha, starting from the Philippines.

We have trademarked Aron Alpha in various countries.

Initiatives toward Carbon Neutrality

**Target: Reduce greenhouse gas emissions by 50% by 2030
(compared to the level in 2013)**

○ Consider in-house possession of renewable energy power generation

- **Solar power:** We are considering the introduction of mega-solar facilities in our factory premises in the future.
- **Small hydropower:** We plan to build a small hydropower facility in Nagano Prefecture (to be completed in 2026).

○ Participate in the Ministry of Economy, Trade and Industry's GX League

- We have endorsed initiatives to reform society toward carbon neutrality and to create new markets.

○ Start sales of GRiNABLE environmentally-friendly elastomers

- These are styrene-based elastomers made using plant-derived biomass materials. It is a product with both high performance in terms of tensile strength and reduced environmental impact.

Color Sheets Made with GRiNABLE

Adhesive Materials Business

■ Automotive Battery Adhesives

Our adhesives are currently being adopted one after another in new hybrid vehicles equipped with bipolar nickel-metal hydride batteries

Vehicles Equipped with Our Adhesives

- Aqua
- Crown
- LEXUS RX
- New Alphard
- New Vellfire

New Vellfire

Polymer and Oligomer Business

■ Lithium Ion Battery (LIB) Binders

Longer life of batteries by suppressing swelling
Lower resistance in batteries with high ion conductivity

Performance Chemicals Business

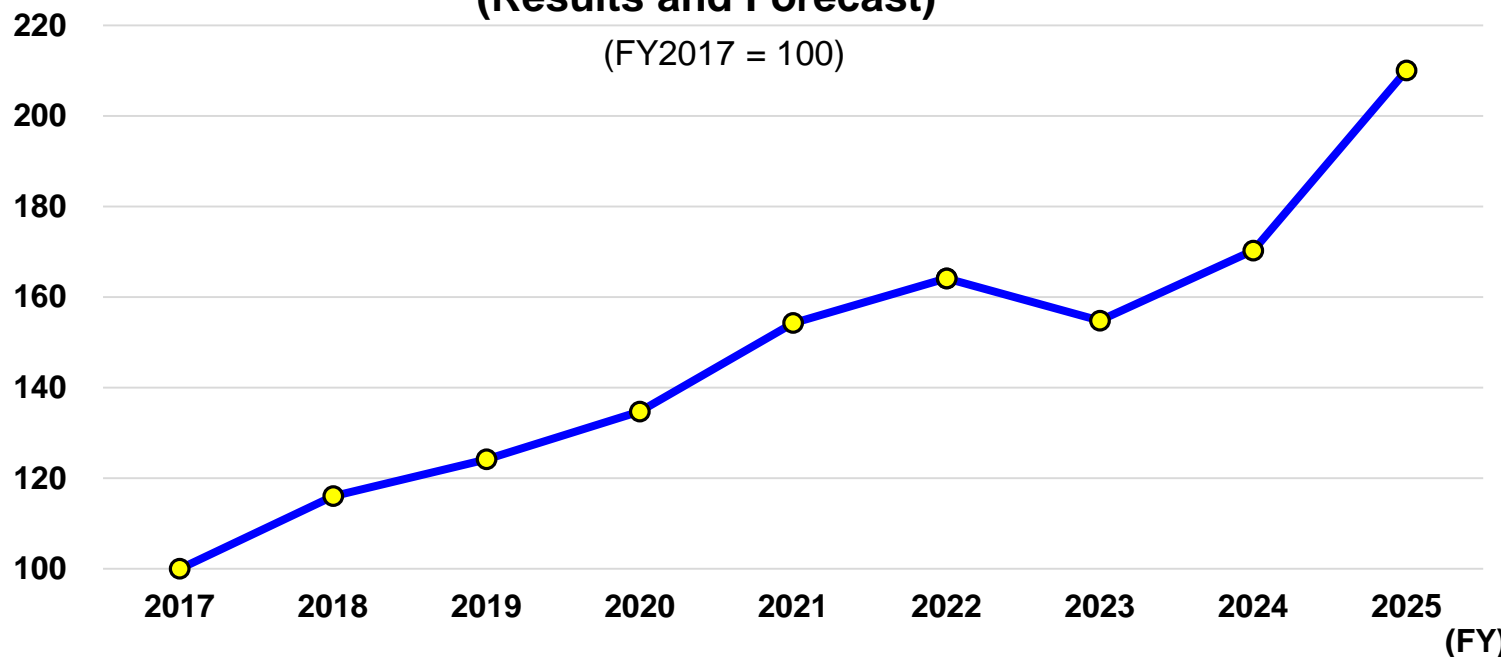

- High-purity liquid hydrogen chloride
- High-purity caustic potash
- High-purity acrylic polymers

Applications: Washing and polishing when manufacturing semiconductor devices

Net Sales of High-purity Liquid Hydrogen Chloride (Results and Forecast)

(FY2017 = 100)

Toagosei Group's Initiatives to Improve Our Price-to-Book Ratio (PBR)

Our Current Situation

We have continued to have a price-to-book ratio (PBR) of less than 1x according to the market valuation of our group since 2018.

→ The slump in our return on equity (ROE) due to an imbalance between our operating income and net worth is the reason why our PBR is less than 1x.

- (i) We have been promoting proactive capital investment in high-performance products. However, it takes time to monetize that investment.
- (ii) The imbalance between the increase in our net worth and the growth in our profits is affecting our capital profitability.

Initiatives to Improve Our PBR

- (i) We need to take measures to further increase our highly profitable high-performance products. Therefore, we are proactively promoting the strengthening of our research and development (R&D) capabilities and our expansion into overseas markets.
- (ii) We will control our net worth to improve our capital efficiency.

→ We will aim to realize a PBR of 1x or more upon achieving an operating income of 24.0 billion yen and an ROE of 8% by 2027.

We will strengthen shareholder returns and control the size of our net worth.

- We will strengthen shareholder returns aiming for consolidated total shareholder returns of 100% during the period of our current medium-term management plan (2023 to 2025).
- We will determine our shareholder returns policy for 2026 and beyond after judging the situation of our investment plans in our next medium-term management plan.

Human Capital Strategy to Support Our Growth Strategy

1. Proactive Recruitment of Specialist Human Resources and Utilization of External Resources

- Proactively recruit specialist human resources (medical care and next-generation batteries) who will bear responsibility for our fourth pillar
- Explore new themes and develop researchers with investment in venture capital companies
- Conduct joint research with the Faculty of Agriculture in the University of Tokyo on signal peptidomes

2. Improvement in Engagement

- Realize a virtuous cycle of growth and distribution by giving incentives such as improving the level of remuneration and retirement money
- Promote an improvement in the working environment and work-life balance measures with a focus on diversity
- Reform work styles both in terms of systems and people's minds

3. Promotion of a Global Personnel Strategy and the Utilization of Diverse Human Resources

- Utilize and develop overseas human resources by visualizing human resource information and developing integrated management mechanisms for overseas subsidiaries
- Provide education to local overseas staff members on our corporate philosophy
- Achieve our target for our ratio of female managers (5% by 2025)
